SPRINT™

Carnauba Speed Wax

FEATURES AND BENEFITS

Sprint™ Carnauba Speed Wax is a liquefied paste wax in an easy to use aerosol can. This spray and wipe, aerosol speed wax makes hand waxing faster than ever. Ultra fine powder abrasives clean and remove light oxidation & contaminants, yet has very little dust and will not scratch. The non chlorinated solvent base of Sprint™ quickly removes adhesive & transport tape residue, tar, road film, bee pollen and exhaust residue. Natural oils provide gloss and lubricity that make for an easy break and an effortless wipe off. Carnauba wax and polymer resins provide a deep gloss finish with lasting protection (up to 30 days). Sprint™ is designed for new car get ready, auction get ready, final finish waxing, express detailing and showroom vehicles that need a light detail. It will cut your new car prep time in half, saving you time, money and labor. Leaves a beautiful, high gloss shine on all automotive paint finishes (urethanes, lacquers and enamels). Apply by hand or orbital buffer.

RECOMMENDED FOR

Sprint™ is designed for new car get ready, auction get ready, final finish waxing, express detailing and showroom vehicles that need a light detail. Leaves a beautiful, high gloss shine on all automotive paint finishes (urethanes, lacquers and enamels). Primarily designed for hand use, Sprint™ can be applied by orbital buffer as well.

APPLICATION

Directions: Shake can well before using. For your protection safety glasses and rubber gloves are recommended while using this product. For badly oxidized finishes, pre-clean surface with P-40 Duz-All® to remove contaminants. For best results, use when can is between 70° and 90°F (21° and 32°C). Point opening of spray button toward surface to be cleaned, holding can 6 to 10 inches (15 to 25 cm) from surface. Spray directly on surface or spray onto a clean cloth or wax pad. Press spray button firmly and

spray liberally. Spread product evenly, rubbing well in a circular motion. Let dry to a haze (about 1 minute) and wipe off with a clean, soft, dry cloth. Polish by hand to a high gloss finish, turning cloth while wiping down. Repeat steps if necessary. If clogging develops, turn spray button 1/4 turn. If clogging persists, remove and clean spray button with a twisting motion, holding top of can and spray button opening pointed away from you.

Orbital Use: Spray onto a clean orbital bonnet. Turn on machine and apply product evenly over entire painted surface with orbital buffer. Let dry to a haze (about 1 minute). Remove with a clean, dry bonnet and burnish to a high gloss finish.

SPECIAL NOTES

For best results, do not apply in direct sunlight or onto a hot surface.

PACKAGING

16 oz. can/12 per case
