- **For Automotive, Janitorial & Household**
- **VOC Compliant**

## AHF-400 AEROSOL FABRIC CLEANER

### FEATURES AND BENEFITS

AHF-400 FABRIC CLEANER is a creamy, foaming cleaner, formulated to "dry clean" all types of automotive interiors. It effectively cleans fabric, velour, vinyl and leather surfaces without saturating the material. Excellent for cleaning headliners and other delicate fabrics. AHF-400 doesn't wet the surface as ordinary interior cleaners are designed to do. The formula blends a biodegradable, non-caustic cleaner with high foaming surfactants and coupling agents and then it is aerosoled for ready to use, convenience. This advanced formula is strong, yet gentle to the fabric or surface that it cleans. The down time is negligible as the foam dries at a fraction of the time it takes wet cleaners to dry. It saves time and performs with excellent results. The handy aerosol is compact and fits anywhere. It fills the need without worrying about open containers and pistol sprayers.

### RECOMMENDED FOR

AHF-400 is a very handy all purpose fabric cleaner. It has varied uses but is mainly used on automotive interiors. Cleans fabric, velour, vinyl, plastic, leather and more. Also for headliners and other delicate fabrics. Excellent for dealerships, detail shops, car washes and auto auctions, where speed and easy to use products are needed. Use for janitorial and household, as well.

### APPLICATION

**Directions: Shake well before using.** For your protection, safety glasses are recommended while using this product. Use the product between 70° and 90°F (21° and 32°C). Clean an area no larger than 2 feet at a time. Hold the can 6 to 8 inches from the surface.

**Fabric, upholstery, carpet & headliners:** Spray on the surface and let it sit several seconds. Dampen a coarse cloth or sponge

and rub gently, but briskly to remove soil. Immediately wipe away remaining foam with a clean, dry cloth. After drying, restore texture to fabric with a soft bristled brush, brushing gently in one direction.

**Vinyl, leather, plastic & rubber:** Spray onto a dampened coarse cloth or sponge and apply to surface. Rub gently, but briskly to remove soil. Wipe off with a clean, damp cloth. Buff lightly after drying. When cleaning seats or armrests, wipe with a damp cloth a second time to ensure all cleaner residue is removed.

### SPECIAL NOTES

To prevent future fabric stains and damage, apply PRO®-Gard™ after the application process.

### PACKAGING

16 oz. CAN/12 PER CASE
