ANS-880 SILIGON™ Aerosol Non-Silicone Dressing

FEATURES AND BENEFITS

ANS-880 SILIGON™ is an easy to use, high gloss, aerosol dressing that is body shop friendly. Its non-silicone formula is a special blend of natural oils that lay down evenly without runs, drips or messy foam to deal with. The solvent base carrier dries instantly and leaves behind a super high gloss shine on all types of surfaces. Restores the new car look to faded rubber, vinyl and plastic without the worries of airborne silicones. Eliminates fish-eye and paint contamination problems. Use on tires, bumpers, rubber mouldings, weather seals, side view mirror housings, windshield cowlings, splash guards, vinyl tops, vinyl interiors, door panels, dashboards, kick panels and rubber mats. Fresh fruit fragrance.

RECOMMENDED FOR

Great for body shops, detail shops, auto

dealerships, car washes, auto auctions and any where else a high gloss, non silicone formula is needed. Use on tires, bumpers, rubber mouldings, weather seals, side view mirror housings, windshield cowlings, splash guards, vinyl tops, vinyl interiors, door panels, air vents, dashboards, kick panels and rubber mats.

APPLICATION

Directions: Shake can well before using. For your protection safety glasses and rubber gloves are recommended while using this product. For best results, use when can is between 70° and 90°F (21° and 32°C). Surface should be clean and dry prior to application. Point opening of spray button toward surface to be treated, holding can 6 to 10 inches (15 to 25 cm) from surface. Press spray button firmly and spray surface liberally.

No wiping is necessary. Dries within seconds to a high gloss shine.

For Less Gloss: Apply to sponge or terry cloth applicator and wipe product on pre-cleaned surface and let dry.

Repeat steps if necessary. If clogging develops, turn spray button 1/4 turn. If clogging persists, remove and clean spray button with a twisting motion, holding top of can and spray button opening pointed away from you.

SPECIAL NOTES

Not for use on clear plastic, (instrument panels), vehicle controls (pedals, grips, steering wheels) or brake discs/drums.

PACKAGING

20 OZ. CAN/12 PER CASE
