Aerosol Tire Shine™

FEATURES AND BENEFITS

Tire Shine™ is a fast and easy to use aerosol that works great on rubber and trim. It quickly renews faded tires, trim, bumpers, rubber seals and weather-stripping. This weather resistant, high gloss coating restores color and shine that lasts for weeks. There is no wiping or messy foam to contend with. Just spray it on and walk away. This special formula can be sprayed on wet tires with excellent results. It won't run or drip. Protects against UV rays that are harmful and cause aging, fading and discoloration. Tire Shine can also be used on vinyl and plastic surfaces including side view mirror housings, black grilles, hood/windshield cowlings, engine compartment hoses, molding, trim, splash guards, door panels, dashboards and hard to reach areas like the a/c vents. Time saving plus convenience makes this product a very good tool to have when time is very important.

RECOMMENDED FOR

Areas in and around the vehicle that require a dressing treatment. Tires are the primary target for this product but it is so versatile that there are dozens of uses for an aerosol dressing. Speed is the essential quality along with a very fine formula that combines this product into a very handy work saver.

APPLICATION

Directions: Shake well before using. For your protection safety glasses are recommended while using this product. For best results, use this product at room temperature. Spray Tire Shine™ evenly onto a clean dry surface utilizing thin coats. Dries to a high gloss. Two light coats are better than one heavy coat. For less gloss, wipe off excess material after spraying.

SPECIAL NOTES

Do not apply to engine compartment when engine is running or hot. Do not use on clear acrylic or plastic (instrument panels or shifter cover). Avoid vehicle controls (pedals, grips, steering wheels, brake discs/drums). Do not drive vehicle immediately after application when tires are wet to avoid unabsorbed product from spinning off onto body panels. For interiors, use ARD-472 PRO®-Shine™.

PACKAGING

16 OZ. AEROSOL CAN/12 PER CASE
