## P-34 PROGOLD™ One Step Cream Wax

### FEATURES AND BENEFITS

P-34 Progold™ is a professional formulation that contains polymers and copolymers which produce a deep, lustrous shine with excellent water beading and detergent resistant characteristics. Progold™ buffs with ease without leaving swirls, streaks or smears. The ultimate one step cream wax that leaves a long lasting, protective finish that resists the damaging effects of water, sun, salt, air pollutants and detergent washings. Progold™ also contains mild cleaners and color brighteners which restore deep color and leave a clear, mirror like depth finish. Brightens dull surfaces without the use of harsh abrasives and resists wax build up. Progold™ has a very fast buffing time. P-34 buffs in about half the time of conventional cream wax

products. Cleans, brightens and protects in one easy operation.

### RECOMMENDED FOR

Progold™ removes fine scratches, swirl marks, light oxidation and minor imperfections. Fills cobweb and hairline cracks. P-34 is safe for all types of paint finishes. It is highly recommended for clear coat finishes. Was designed and formulated for hand or machine use.

### APPLICATION

SHAKE WELL BEFORE USING. For hand application, apply P-34 from a dispenser bottle to a clean applicator and rub into finish well. Let dry to a haze and wipe to a high luster using a PT-8 Microfiber

Polishing Cloth. For machine application: Apply a small amount of P-34 from a dispenser bottle to the painted surface. Place high speed buffer directly over the product. Slowly apply buffing pressure over the surface with either a VF-85-C Yellow Foam Polish Pad or RV-85-C Charcoal Foam Finish Pad @1400-2300rpm. Burnish surface to a high gloss.

### SPECIAL NOTES

Do not apply P-34 in direct sunlight or to a hot surface.

### PACKAGING

PINT/12 PER CASE  
1 GALLON/4 PER CASE
