FAST-TRAK™ **Liquid Carnauba Wax**

FEATURES AND BENEFITS

Fast-Trak™ is an easy to use liquefied paste wax designed for new car prep, auction prep, final finish waxing, express detailing and showroom vehicles that need a light detail. Ease of use is the main objective of Fast-Trak™. Formulated to spread easily and dry quickly for the fastest detail available. It is designed as a two stage formula that separates into the solvent base on top and the carnauba wax, polymers and cleaning agents on the lower stage of the suspension. When shaken together, these components form a creamy, water viscous solution that stays together without constant shaking. This is important because it yields a more consistent mixture throughout the life of the bottle. Carnauba wax and polymers remove swirls and provide a deep gloss finish with extended protection (up to 60 days). Ultra fine powder abrasives clean and remove light oxidation & contaminants, yet has very little dust and will not scratch. The solvent base of Fast-Trak™ removes adhesives, transport tape residue, tar, road film, bee pollen and exhaust residue that is normally difficult to remove with other cleaner wax products. Silicone polymers provide gloss and lubricity that make for an easy break

and an effortless wipe off. It will cut your new car prep time in half, saving you time, money and labor. This easy to use formula spreads with very little effort and dries quickly for the fastest and easiest detail available. Leaves a beautiful, high gloss shine and is safe on all automotive paint finishes (urethanes, lacquers and enamels).

RECOMMENDED FOR

Fast-Trak™ is designed for new car get ready, auction get ready, final finish waxing, express detailing and showroom vehicles that need a light detail. Leaves a beautiful, high gloss shine on all automotive paint finishes (urethanes, lacquers and enamels). Primarily designed for hand use, Fast-Trak™ can be applied by orbital buffer as well.

APPLICATION

Directions: Shake well before using. For best results, pre-clean surface with P-40 Duz-All® to remove oxidation and surface contaminants before applying Fast-Trak™.
Hand Use: Apply to a clean, soft, dry cloth or

wax pad. Wipe product evenly over a small area of painted surface, rubbing well in a circular motion. Let dry to a haze (about 1 minute) and wipe off with a clean, soft, dry PT-8 Microfiber cloth. Polish by hand to a high gloss finish, turning cloth while wiping down.

Orbital/DA Use: Apply liquid wax to a clean orbital bonnet. Turn on machine and apply product evenly over entire painted surface with orbital buffer. Let dry to a haze (about 1 minute). Remove with a clean, dry bonnet and burnish to a high gloss finish.

SPECIAL NOTES

For best results, do not apply in direct sunlight or onto a hot surface. Keep container closed when not in use. For aerosol convenience, try ACW-440 Sprint® Spray Wax.
