AQUA GLOSS™

Liquid Polymer

FEATURES AND BENEFITS

AQUA GLOSS™ is a high gloss liquid polymer designed for final finish use on wet or dry exterior surfaces. Creates a quick water breaking action that reduces drying time and eliminates water spotting on wet vehicles. Leaves a high gloss shine as you dry. Its modified silicone polymer will last up to 3 months. Quickly wipes away bugs, tar, road film, grease pencil and crayon marks. Requires no intensive rubbing or buffing. Contains no cleaners. Excellent results on all types of paint finishes as well as plastic, chrome and glass surfaces. Safe for rubber side molding and trim with no hazing or whitening. V.O.C. Compliant.

RECOMMENDED FOR

Final finish use on wet or dry vehicles. Excellent results on all types of paint finishes as well as plastic, chrome and glass surfaces. Quickly wipes away bugs, tar, road film, grease pencil and crayon marks. Safe for rubber side molding and trim with no hazing or whitening. V.O.C. Compliant.

APPLICATION

SHAKE WELL BEFORE USING. Product separates by design. For your protection, rubber gloves and safety glasses are recommended while using this product. See MSDS for additional precautions. For best results, do not apply in direct sunlight. Do not apply to a hot surface or let dry on surface. Product may be applied to a wet or dry vehicle.

Dry Application: Using a trigger sprayer, apply Aqua Gloss™ by misting directly onto pre-cleaned surface or on a microfiber applicator pad and then wipe onto pre-cleaned surface.

Spread evenly over surface, rubbing in well with a circular motion. Let dry to a haze (about 1 minute) and wipe off with a clean, soft PT-8 microfiber polishing cloth. Polish, by hand, turning towel while wiping down. Leaves a long lasting, deep gloss shine.

Wet Application: Wash vehicle and leave surface wet. Using a trigger sprayer, apply Aqua Gloss™ by misting directly onto wet exterior surfaces. Wipe down treated surfaces with a clean PT-8 microfiber polishing cloth or applicator pad. Remove using a second clean, dry PT-8 microfiber polishing cloth. Polish, by hand, turning towel while wiping down. Leaves a long lasting, deep gloss shine.
