S-92

PREMO® DRESSING & PROTECTANT

FEATURES AND BENEFITS

S-92 PREMO® is a high grade, waterbase dressing & protectant that is sure to win the heart of detailers. This Premium Vinyl & Rubber Dressing utilizes high viscosity silicones to produce a rich, high gloss, long lasting shine on interiors and exteriors. S-92 has all the protective qualities (water repellent-detergent resistant) of all our other fine dressings plus a pleasant cherry fragrance. In addition, PREMO® contains UV inhibitors to shield out harmful effects of the sun, such as fading, hardening and cracking. S-92 is a conditioning restorer that softens, brightens and renews faded surfaces of vinyl, rubber and plastic. This ultimate protectant gives surfaces that "wet look" shine. Because it has more gloss, it has more protectant, so it lasts longer too.

RECOMMENDED FOR

S-92 will give an extra high gloss to everything from rubber, vinyl or plastic. It is ideal for all types of automotive applications. Use on tires, bumpers, moldings, trim, vinyl tops & seats, interior plastic, rubber mats and dashboards. Prevents drying, cracking, fading and hardening of rubber, plastic and vinyl surfaces on both interiors and exteriors. S-92 is the perfect dressing to use anytime a super high gloss is desired.

APPLICATION

Directions: Shake well before using. For your protection, safety glasses and rubber gloves are recommended while using this product. On badly weathered and soiled surfaces, pre-clean with C-52 Whitewall Cleaner or C-49 Heavy Duty Interior Cleaner, depending on the surface to be cleaned.

Tires: Hold sprayer 2" to 4" from tire and spray evenly on a clean, dry surface. Allow 2-3 minutes for runs or drips to dissipate. Dries to a super high gloss. For less gloss,

apply with sponge or terry applicator.

Rubber & plastic trim: Wipe on pre-cleaned surface and let dry.

For Satin Gloss: Dilute 1:1 with water for in separate quart container only. Product must be shaken before each use when it has been diluted.

SPECIAL NOTES

Not for use on clear plastic, (instrument panels), vehicle controls (pedals, grips, steering wheels) or brake discs/drums. Do not drive vehicle immediately after application when tires are wet to avoid unabsorbed product from spinning off tires onto body panels.

PACKAGING

PINT/12 PER CASE
GALLON/4 PER CASE
5 GALLON CUBE
55 GALLON DRUM
