S-97-5

WIPE-ON GLOSS™

FEATURES AND BENEFITS

S-97 Wipe-On Gloss is a thick waterbase formulation that lies down immediately with a gloss that won't run or drip. It dries to a non-tacky high resolution shine.

S-97 wipes on clear with no milky residue. Works great on tires, trim, bumpers and more. The thick emulsion is what makes it ideal to wipe on tires instead of sprayers. There is no waiting as it sets up immediately.

One feature that stands out is that it doesn't matter if the tire is wet or dry. The product can be applied to either surface with excellent results. Wiping on dressing is a better way of applying it because there is no excess to cause the product to sling off.

Wipe-On Gloss not only is smoother but is more economical because there is no waste. The nonflammable formula is versatile and safer.

RECOMMENDED FOR

Exterior trim, bumpers and tires. Great on rubber moldings and plastic. Can also be used on vinyl roofs. Ideal for car washes where tires are not always dry. Excellent product where flammable and combustibles are not allowed and areas that you want to control the gloss levels.

APPLICATION

Directions: Shake well before using. For your protection, safety glasses and rubber gloves are recommended.

Tires: Saturate a sponge, foam or terry applicator with Wipe-On Gloss Dressing and apply evenly on a clean surface. For best results, use foam dressing applicator. To control gloss level, wipe off any excess to get the desired results. May also be used with "swabby" sure shot

style tire dressing applicator.

Rubber, plastic and vinyl: Use the applicator to lay down a smooth coating and allow to dry. Using a dry cloth, you can wipe the surface to produce a natural luster.

SPECIAL NOTES

Not for use on clear plastic (instrument panels), vehicle controls (pedals, grips, steering wheels) or brake discs/drums. Do not drive vehicle immediately after application when tires are wet to avoid unabsorbed product from spinning off tires onto body panels.
